## Definitions:

“Patent” is a property right granted by the US Government, which gives the holder the exclusive right to exclude others from the manufacture, use and sale of the subject invention in the United States for a defined period of time. As property, the patent may be sold or assigned, pledged, mortgaged, licensed, willed, or donated, and the subject of contracts and agreements.

“Subject Invention” means those inventions conceived or first actually reduced to practice under this contract.

“Prototype Project” is as follows: a prototype project addresses a proof of concept, model, reverse engineering to address obsolescence, pilot, novel application of commercial technologies for defense purposes, agile development activity, creation, design, development, demonstration of technical or operational utility, or combinations of the foregoing. A process, including a business process, may be the subject of a prototype project.

## Introduction:

The Seller agrees to be bound by the following rights and responsibilities with respect to any Subject Invention (i.e. any Invention made in the performance of the Statement of Work) or Prototype which is the principal objective of the Prototype Project executed under the contract.

## A. Allocation of principal rights

1. The Seller shall retain ownership throughout the world to each Subject Invention consistent with the provisions of this section and 35 U.S.C. § 202, provided the Seller has timely pursued a patent application and maintained any awarded patent and has not notified the Government (in accordance subclause (B) below the Seller does not intend to retain title.
2. The Seller shall retain ownership throughout the world to background inventions. Any invention related to, conceived of, or first reduced to practice in support of a Seller’s internal development milestone shall be a background invention of the Seller and shall not be classified as a Subject Invention, provided that an invention conceived of in support of an internal development milestone that is first reduced to practice under this contract in support of other than internal development milestones shall be considered a Subject Invention.
3. The Government is granted a nonexclusive, nontransferable, irrevocable, paid-up license to practice or have practiced for or on behalf of the United States the Subject Invention throughout the world.

## B. Invention Disclosure, Election of Title, and Filing of Patent Application

1. The Seller shall disclose each Subject Invention to the Agreements Officer, via the Buyer, on a DD Form 882 within eight (8) months after the inventor discloses in writing to the Seller’s personnel responsible for patent matters.
2. If the Seller determines that it does not intend to retain title to any Subject Invention, the Seller shall notify the Agreements Officer via the Buyer, in writing, within eight (8) months of disclosure to the Government.

However, in any case where publication, sale, or public use has initiated the one (1)-year statutory period wherein valid patent protection can still be obtained in the United States, the period for such notice is shortened to at least sixty (60) calendar days prior to the end of the statutory period.

## C. Conditions When the Government May Obtain Title

Upon the Buyer or USG Agreements Officer’s written request, the Seller shall convey title to any Subject Invention to the Government under any of the following conditions:

1. If the Seller fails to disclose or elects not to retain title to the Subject Invention within the times specified in paragraph (b); provided, that the Government may only request title within sixty (60) calendar days after learning of the failure of the Seller to disclose or elect within the specified times.
2. In those countries in which the Seller fails to file patent applications within the times specified within paragraph (b); provided, that if the Seller has filed a patent application in a country after the times specified in this paragraph (b) of this Article, but prior to its receipt of the written request by the Government, the Seller shall continue to retain title in that country; or;
3. In any country in which the Seller decides not to continue the prosecution of any application for, to pay the maintenance fees on, or defend in reexamination or opposition proceedings on, a patent on a Subject Invention.

- D. Minimum Rights to the Seller and protection of the Seller's right to file.
1. The Seller shall retain a nonexclusive, royalty-free license throughout the world in each Subject Invention to which the Government obtains title, except if the Seller fails to disclose the Subject Invention within the times specified within this Article. The Seller's license extends to the U.S. (including Canada) subsidiaries and affiliates, if any, within the corporate structure of which the Seller is a party and includes the right to grant licenses of the same scope to the extent that the Seller was legally obligated to do so at the time the prototype project was awarded. The license is transferable only with the approval of the Government, except when transferred to a successor of that part of the business to which the Subject Invention pertains. The Government's approval for license transfer shall not be unreasonably withheld.
  2. The Seller's license, as immediately described above in (D)(1), may be revoked or modified by the Government to the extent necessary to achieve expeditious practical application of the Subject Invention pursuant to an application for an exclusive license submitted consistent with appropriate provisions at 37 C.F.R. Part 404. However, the license shall not be revoked in that field of use or the geographical areas in which the Seller has achieved practical application and continues to make the benefits of the Subject Invention reasonably accessible to the public. The license in any foreign country may be revoked or modified at the discretion of the Government to the extent the Seller, its licensees, or its subsidiaries or affiliates have failed to achieve practical application in that foreign country.
  3. Before revocation or modification of the license, the Agreements Officer or Buyer shall furnish the Seller a written notice of its intention to revoke or modify the license, and the Seller shall be allowed thirty (30) calendar days (or such other time as may be authorized for good cause shown) after the notice to show cause why the license should not be revoked or modified.

The Seller agrees to require, by written agreement, its employees, other than clerical and non-technical employees, to disclose promptly in writing to personnel identified as responsible for the administration of patent matters and in a format suggested by the Seller each Subject Invention made under this Agreement in order that the Seller can comply with the disclosure provisions of paragraph (b) of this Article. The Seller shall instruct employees, through employee agreements or other suitable educational programs, on the importance of reporting Subject Inventions in sufficient time to permit the filing of patent applications prior to U.S. or foreign statutory bars.

The Seller shall include within the specification of any United States patent application and any patent issuing thereon covering a Subject Invention, the following statement:

"This Invention was made with Government support under Agreement No. FA8814-21-9-0001, awarded by SMC/PKT. The Government has certain rights in the Invention."

Such action is necessary because the Seller or assignee has not taken effective steps, consistent with the intent of this Agreement, to achieve practical application of the Subject Invention;

Such action is necessary to alleviate health or safety needs which are not reasonably satisfied by the Seller, assignee, or their licensees; or

Such action is necessary to meet requirements for public use and such requirements are not reasonably satisfied by the Seller, assignee, or licensees.
