A. PROGRAM SECURITY AND PUBLIC RELEASE

(1) Program Security

- (a) **Controlled Unclassified Information.** There are types of information, that are not classified, that require application of controls and protective measures for a variety of reasons. This information is known as controlled unclassified information (CUI). This clause 5.A covers the definition of CUI and provides basic information about the nature of this information and the procedures for identifying and controlling it. The types of information considered CUI for the Future Combat Systems (FCS) program are "For Official Use Only" information and information contained in technical documents.

(1) **Protection of CUI Information**

(a) **Storing/Handling.** During working hours, reasonable steps should be taken to minimize risk of access by unauthorized personnel. After working hours, CUI information shall be stored in locked desks, file cabinets, bookcases, locked rooms, or similar means. CUI may not be displayed in public places, such as airports, airplanes, restaurants, etc. Computers used for processing CUI do not need to be accredited for classified use. However, personally owned computers are not authorized for processing CUI.

(b) **Dissemination.** Printed documents and material containing CUI may be transmitted through mail channels or hand carried without formal courier orders. Transmission of CUI information by voice or facsimile (voice, fax, VTC, etc.) should be by approved secure communications systems whenever possible. Digital transmission will be by FCS Advanced Collaborative Environment (ACE) or Army Knowledge Online (AKO) collaborative suites. However when ACE and AKO are not feasible (e.g., foreign suppliers, non-FCS associated personnel, etc.). The following guidelines apply:

- (1) Collaborative suites may be used by personnel not located on a government backbone (i.e., NIPRNET) without Government Future Combat Systems (Brigade Combat Team) (FCS (BCT)) Security Office approval provided all of the following requirements apply:

- (a) Use only NIST approved cryptographic vendors and algorithms. The latest validation lists may be obtained at: <http://csrc.nist.gov/cryptval/> ,
- (b) An internally hosted service which (does not use third-party collaborative suite service provider), and
- (c) Notify Buyer's Authorized Procurement Agent in writing of the collaborative suite and revision (to facilitate obtaining the FCS Office of the Chief Information Officer and Government FCS (BCT) Security Office approval for utilizing an alternative collaborative suite and version).

- (2) Personnel with access to NIPRNET require local Designated Approving Authority (DAA) approval prior to participation in any collaborative suite that requires installation of mobile code on the local NIPRNET connected system.

- (3) CUI may be transmitted/disseminated, processed, and stored internally (within your own domain (e.g., Boeing to Boeing and SAIC to SAIC)) without encryption when distribution is to an authorized recipient and the receiving system is protected by either physical isolation or a password protection system. Discretionary access control measures must be used to preclude access to CUI data by authorized users but who are not authorized access to CUI information.

- (4) External transmission/Dissemination of CUI (i.e. email and file transfers) outside your own domain (e.g. Boeing to SAIC) and NOT to or from a DoD computer shall use applications utilizing NIST approved cryptographic vendors and algorithms. The latest validation lists may be obtained at: <http://csrc.nist.gov/cryptval/>.
 - (5) External transmission/dissemination of CUI (i.e. email and file transfers) to or from a DoD computer, to include contract deliverables, shall be encrypted by use of a DoD approved Public Key Infrastructure Certification.
