SELLER'S INSPECTION / ACCEPTANCE STAMPS FOR PROCURED ITEMS

Inspection stamps shall be designed to identify the Seller, the Seller's process and the Seller's personnel who applied the stamp. When direct use of the inspection stamp is impracticable because of size, construction, or number of parts, the stamp shall be applied to an attached tag, label, sticker, or plate, or to the package containing the item. Stamps shall be used to control individual in-process manufacturing operations (e.g. Heat Treat, X-Ray, Magnetic, Ultra Sonic, Tests, Material Review, Etc.). Acceptance by the Seller of items to be delivered to Buyer shall be indicated by means of the Seller's final acceptance stamp.
