

## **Section 6 : QUALITY ASSURANCE CLAUSES / CQAR**

---

### 611. Preproduction Approval of Castings and Forgings (10/1/96).

(a) Buyer's approval of preproduction samples (castings) and test reports (forgings and castings) is required as defined by the drawing or other contract requirements. Preproduction approval must be received by Seller prior to producing the balance of the order. Laboratories selected for testing must be approved by Buyer per Corporate Quality Assurance Regulation (CQAR) 5, MDC Process Sources - Survey, Approval and Documentation.

(b) If, under a previous contract, Buyer has provided preproduction approval for the goods ordered by this contract, another preproduction approval is not required under this contract unless, subsequent to the previous approval, there have been changes to the configuration of the goods, to Seller's processes used in the production of the goods, or to the tools that determine the size, shape, or dimensions of the goods.
