

Section 6 : QUALITY ASSURANCE CLAUSES / CQAR

637. Electrostatic Discharge Protection (10/1/96). Goods ordered by this contract require electrostatic protection and must be properly packaged and identified. All goods must be shipped with their leads electrically shorted together in noncorrosive, conductive foam or other suitable method of packaging. All goods will be placed in conductive or static-dissipative packages, tubes, carriers, conductive bags, etc., for shipment. The packaging must be clearly labeled to indicate that it contains electrostatic sensitive goods.

NOTE: Lead shorting is not required for goods such as Dual Inline Packages (DIP's) shipped in conductive rails or tubes.
